43455	55 gallon drum 30W		\$2075.00

***LIMITED AVAILABILITY**

Enviro Formula 2 cycle lubricant

When it comes to making the best environmental choice, OPTI-2 is the cleanest two cycle oil available. *Opti-2 exceeds the highest worldwide performance standard E-GD+ and is fully compatible with oxygenated fuels.*

OPTI-2 --A single mix for ALL 2 cycle engines

--Increased performance and longer engine life -- Smoke free operation -- Contains fuel stabilizer

orders@boettchersupply.com

PFERD manufactures the highest quality chain saw files in the world. Their uniform steel structure, correct hardness, exact shaping and even tooth spacing guarantee maximum cutting performance. This greatly reduces labor time and puts a perfect edge on saw chains every time. The size and type of chain as well as the degree of wear will determine which file to use.

CHAINSAW

PART #	DESCRIPTION	RETAIL	DEALER
CSX CHAIN CHARPENERS - Sharpening with CHAIN SHARP CS-X guarantees longer durability and use of the saw chain. No time-consuming conversion, simply change from left to right tooth by turning the device.

HONDA ENGINES

The correct model and spec number are needed to find the correct replacement engine. Arrows show where the numbers should be located.

To find the **model number**, look for a model number sticker on the engine. All Honda engines model numbers start with the letter “G,” such as “G100”, “GX610”, or “GXV160.”

The **engine type code** is stamped into the side of the engine, usually close to the serial number. Engine type codes may be up to 4 characters. If a code is less than 4 characters, you may see asterisks as placeholders (i.e. an engine stamped with QX** is a QX type engine.)

The **engine serial number** is stamped into the side of the engine. All Honda engine serial numbers have a 4 or 5 letter prefix followed by a 7 digit number.

IDENTIFYING YOUR BRIGGS & STRATTON ENGINE

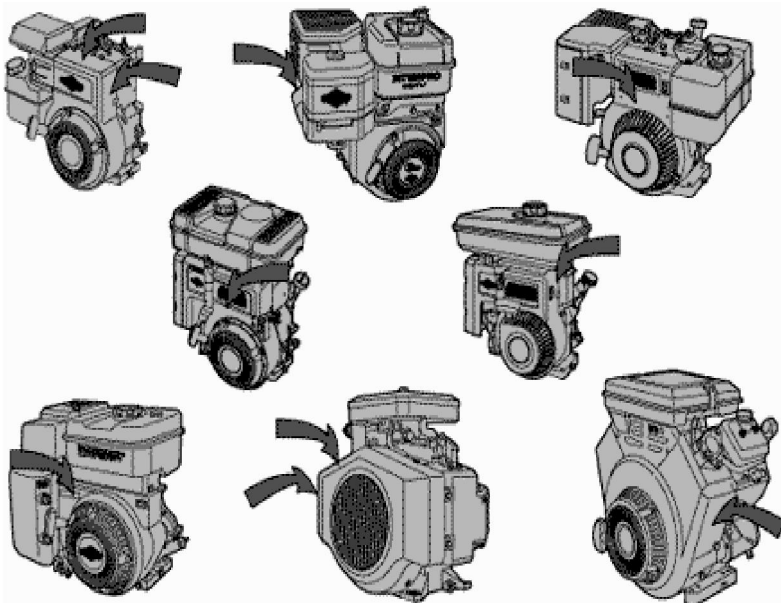

The Model, Type and Code numbers, stamped directly into the engine, are used to identify our engines. Engines used in lawnmower applications usually have these numbers stamped into the blower housing, muffler heat shield or a few inches above the spark plug. Depending on the type of engine shroud used, the engine numbers may be covered. It may be necessary to remove this shroud in order to locate the Model, Type, and Code.

Many horizontal shaft, overhead valve engines have these numbers stamped into the OHV rocker cover. However, on certain overhead valve powered generators, the equipment manufacturer installs a decorative chrome rocker cover OVER our cover. If your engine has a decorative cover, it may be necessary to remove it in order to locate the Model, Type, and Code.

The pictures below show the different style of Briggs & Stratton Engines and where the model, type and code identification numbers should be located.

Also, be aware that the numbers found on the Engine Emissions Label can be confused with the engine Model, Type, and Code. Unfortunately, these numbers cannot be used to identify your engine.

THE CORRECT MODEL, SPEC AND CODE DATE ARE NEEDED TO LOOK UP THE CORRECT PARTS. THE FACTORY HAVE STARTED PLACING THESE NUMBERS ON THE BLOCK OF THE ENGINE INSTEAD OF THE SHROUDING. THE FAMILY NUMBER ON THE SHROUDING ***CANNOT*** BE USED TO LOOK UP PARTS

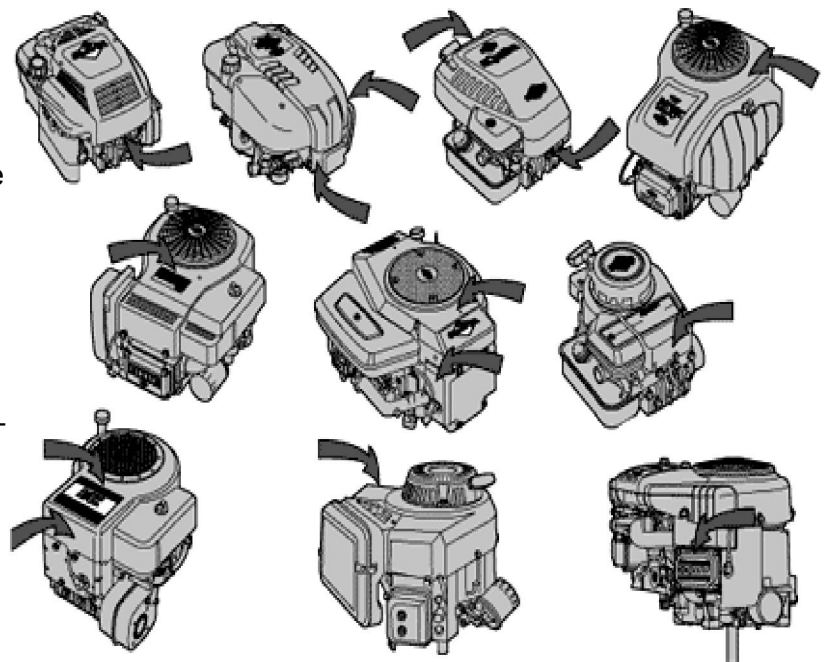

ENGINES LINES

ALWAYS GET THE CODE DATE

The code number identifies the assembly date of the engine. In *most* instances it is necessary to know the code number as well as the model and type number when performing adjustments, repairs or ordering replacement parts for an engine. Here is how it works:

CODE 01061201, The code is the manufacturing date and is read as follows:

01 - Year; **06** - Month;
12 - Day; **01** - Assembly Line and Plant

FLEXIBLE OIL DRAIN HOSE

- Hi-temperature, heavy duty braided rubber hose designed for durability
- Pressure tolerance 400 psi.
- Durable all brass fittings for quality and service
- Tethered rubber loop maintains connection between hose and threaded cap
- Fittings convert to SAE wrench size

51044-0902

Flexible Oil Drain Hose
16" Length x 3/4" width

RETAIL - \$51.09

MUFFLERS

- Durable stainless steel construction
- No paint flake
- Rust resistant
- Bolt on ready

*For valve cover with pulse-type fuel pump, not mechanical fuel pump. Includes O-Ring

**For valve cover with mechanical fuel pump. Includes O-Ring

***Used with flare tube for improved seal. Standard since serial no. 3016800011. Earlier standard dipstick 24-038-06-s superseded to 124-755-121-S kit which includes the 24-038-10-s Dipstick and three Dipstick tubes to fit all CH Twin configurations.

****Can be used in place of the 1" diameter metal oil fill/dipstick tube for improved seal. Can be used with standard metal canister style mufflers. Do not use on applications with crossover manifolds.

Mo-Deck

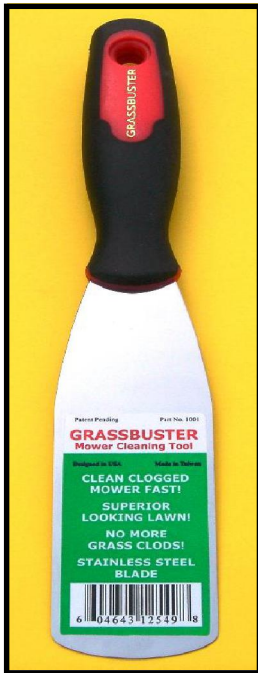

A polymere spray that adheares to the mower decks, blades, snowblower, snowshovels or ATV'S and Dirt Bikes. Builds up over time, the more you use, the better it gets. Now clean up is a breeze and your equipment will run more efficiently, too.

Simple to apply, shake and spray, convenient for larger deck areas
 Ready to use in less than 10 minutes after spraying
 Creates a slick, non-stick surface, ideal for build-up areas
 Reduces mechanical wear and can extend operating life of products
 Will not attract or hold dirt or dust
 Proudly made in the USA, in use for over 10 years!

PART #	DESCRIPTION	RETAIL
MO-DECK	16 oz Spray Can	\$ 7.95

LINES

THE GRASSBUSTER!

Though this tool looks suspiciously like a regular spatula repurposed for lawnmower duty,

IT IS NOT!!

Specifically designed to clean debris from the underside of a mower deck, it has a durable 2" wide stainless-steel blade that has been taper ground along its 5" length for flexibility, allowing it to quickly conform to the underside of a mower deck. The blade corners have also been rounded to prevent scratches.

Well made in the USA!

This tool is simple yet effective
 (and superior to a screwdriver!)
 for removing caked-on grass

AS5P	5 gallon pump	\$ 70.00

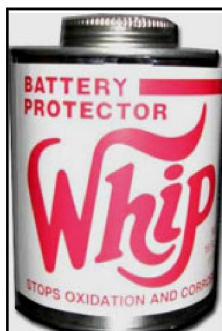

Amerseal is a scientifically developed preventive maintenance chemical compound. It is a premium heavy duty tire sealant for commercial and industrial tires that are subject to heavy use.

Amerseal is installed quickly and easily through the valve stem with our injection pump without deflating the tire. The tire is protected against leaks for the remainder of its life. A puncture that occurs while driving will seal almost instantly and very little air is lost.

Amerseal will permanently seal tread area up to 1/4" and maintain proper inflation. By maintaining proper inflation, the tire will generate less heat and friction so it will last longer. It is easy to use with no special mixing or preparation needed. Also, Amerseal is fluid and effective in temperatures down to 30 degrees below zero.

Heavy Duty Tire Repair Kit

Nealey Company produces high quality tubeless tire repair kits that plug the hole and patch the inside of the tire quickly, permanently, and easily. Our Tire Repair Kits include a non-bending, break-resistant insertion tool and non-tearing repair strands made of synthetic rubber containing no glue or cement.

How Nealey Tire Repair Kits Work

The secret to the Nealey Tire Repair Kit is the repair strand designed to last for years. The Nealey Tire Repair Kit repair strand is a cord consisting of uncured butyl and silicone rubber products that cure into the puncture, plugging the hole and forming a seal on both the inside and outside of the tire.

1. Insert unthreaded tool into puncture and rock vigorously to clean hole
2. Thread repair cord through eye of inserting tool until ends are even
3. Insert tool into puncture all the way to handle, then turn 1-1/2 revolutions.
4. Pull tool out until top just clears tire surface. Cut exposed cord to free tool.

Hole is now plugged and a patch-like repair remains on the inside.

Part # 11007 -- MINI TIRE REPAIR KIT

Contains - Ten 7-inch repairs and inserting tool
Repairs 2 and 4 ply tires on autos, small pickups, motorcycles, ATV's, golf cars, graden tractors, riding mowers, etc.

Rope RATCHET[®] TIE-DOWN

The easy-to-use **ROPE RATCHET** is the answer to all your tie-down needs for work or play. The patented design and rugged construction lets you secure a wide variety of loads quickly and easily.

With the **ROPE RATCHET** you simply attach the two hooks and pull the loose end of the rope for a secure, tight hold. **ROPE RATCHETS** stay tight, locking in place as you pull the free end. To loosen you just pull the rope to reduce tension and push the handy thumb release.

It's that easy!

Designed to save time in lawn maintenance, the All New PECO Z-Trimmer attaches to virtually any zero-turn mower deck and is fully operable from the operator's seat.

Features include a spring loaded 2-way break-away platform that functions when encountering an obstacle, adjustable head for trimming/edging and has a 20" reach from the mower deck. Folds out of the way for easy transport!

FEATURES:

- DC Motor with sealed end engine cap
- Operating range 10-30 amps
- Easily Folds for Transport
- Shaft Debris Shield
- Cast aluminum fixed head
- Resettable circuit breaker prevents mower battery overdraw
- 140 degree range of head movement for trimming or edging
- 20" reach from the edge of the mower deck
- Transport lock - prevent trimmer movement while not in use
- Powerful DC motor with sealed end cap spins at 4600 RPM
- Increase productivity on zero turn mowers
- Quick and easy assembly
- Recommended for mowers w/ 48" decks or larger and having at least 20" of clearance from edge of deck to mower frame

LEAF BLOWERS

Mighty Mac® leaf blowers by MacKissic create gale force winds between 160 mph and 200 mph to blow leaves and debris into neat windrows or piles. This gale is created by a balanced poly fiber reinforced impeller. This helps the machine run quieter and smoother. EZ Models have extra large rear pneumatic tires.

SPRAYERS

Mighty Mac® sprayers by MacKissic are powerful and versatile sprayers that will allow you to have a professionally looking lawn in less time than it takes to mow. Mighty Mac® sprayers are powerful enough to reach the tops of trees as tall as a three story house, yet can be gentle enough to water flowers with a fine mist.
