Ritchie Waterer Freight Policies

Parcel Post / UPS / Fedex / Common Carriers

If there is a preference to a freight line or particular company to ship on, we would like to know. Once material is loaded on a truckline it is out of our hands until it arrives to you.

Be sure to check units over when delivered. All claims for damage are between **YOU** and the carrier. We cannot take care of damage in shipping.

Common carrier shipments being shipped to residential customers could cost up to double the price. Whenever possible, it's always best to ship to a business that does not incur this extra surcharge.

All waterers are subject to freight charges.

All backorders for discontinued unit parts will be shipped direct from the factory with freight added.

On large orders with parts backorders, they will be shipped n/c for freight. These items must be able to be shipped on parcel post or UPS. If a backordered item is under \$50 value, we will call to see if you still need them.

We will always try to find the most economical way to ship products to help you and your customer.

Via Salesperson / Scheduled Delivery by Boettcher Supply, Inc.

\$20.00 for 1 unit on a Boettcher Supply, Inc. vehicle.

For multiple units, there will be \$15.00 charge **per waterer**.

These rates apply only to Boettcher Supply, Inc. truck deliveries, **NOT** on a common carrier.

Common carrier delivery rates will be what the carrier charges Boettcher Supply, Inc.

These deliveries will be made when our salesperson is in your area and/or there are enough units to make a load on our company truck or trailer.
